

COMP 4350 Project Iteration 2

Group G (Study Buddy Finder)

Implementation and deployment: (5/7)

- End-to-end, fully working (back-end, front-end, DB, and AWS) features for the user stories planned for iteration 2. (2/4)

Couldn't verify the following stories in your plan documents (-2):

- Viewing Profiles
- Rating System
- Correctly deployed service on AWS (3/3)

Comments:

- Your implementation is minimal and you just have three features implemented
 - Like/dislike users
 - Updating user profiles
 - Deleting user's account
- I put like on all the test users but didn't get any match therefore couldn't verify the features implemented for the matched users!

Bugs:

- After logout click back button it goes back into the application again

Testing: (10/10)

- Back-end unit tests for the new and old classes (2/2)
- Front-end unit tests (e.g., using Jasmin) (3/3)
- At least one integration test per detailed story (3/2)
- Selenium. at least one automated end-to-end test per user story. (3/3)

Comments:

- There are comprehensive unit test as per below:
 - Back-end (DB_unit_tests.js, UserMatch_unit_tests.js, ...)
 - Front-end (frontend_function_tests.js)
 - Integration (integration_tests.js)
- For automated end-to-end test, the team used nightwatch.js which node.js based automated testing solution.

Design and documentation: (5/5)

- Good programming practices (1/1)
- Proper design patterns (2/2)
- Normal level of refactoring in the code-base toward a better design, in every iteration. (1/1)
- a RESTful service (or any alternative) (1/1)
- A missing API documentation (or missing info such as the location of the service and how to use it). (0/-1)
- A missing installation guide for anything that is not in the documentation, like any special setting if required. (0/-1)

Comments:

- The team has provided basic API document describing the services.
- There is a detailed setup guideline in the GIT.

Process and planning: (3/3)

- Team's communication and members' contributions (2/2)
 - Look at the logs of the meetings (or if they use external messaging tools, then a log of those tools).
- Following the plan (1/1)
 - The plan should be followed and be updated with the details about the next iteration (detailed stories plus their cost and priorities).

Comments:

- Detailed communication logs and team member's contributions are provided.
- Plan document has been updated with next iteration detailed stories.

Total (23/25)
